

# Inspection of *Tobacco Packaging*

Check the quality of **tobacco packaging** easily and quickly

## Ensure tobacco package compliance

With EyeC inspection systems, **verify the quality of your tobacco packaging – including artwork and health warnings** – in one inspection cycle. Thanks to our comprehensive portfolio, perform quality checks **at each of the production stages** easily. Ensure that your cigarette and tobacco packs are **in full compliance with legal requirements**.

## Compliant health warnings

The EyeC HWIT (Health Warning Inspection Tool) helps you easily create a merged file that you will use as reference during inspection processes. It enables you to **assign health warnings coming directly from Health Warning Document Libraries** – such as general warnings, additional warnings, and side information messages – **to your artwork file**. As a result, you are sure to generate a reference file that contains compliant health warnings.

## PDF check and print sample testing

Automatically **check your tobacco packages against a reference file at pre-press** with the help of the EyeC Profiler Graphic **or during printing** with the help of the EyeC Profiler. EyeC systems detect all items automatically and inspect the complete content of your files or printed samples. **Text, graphics, health warnings, 1D and 2D codes are checked in a single inspection cycle**. EyeC systems pinpoint all potential differences with great precision and help you detect any quality issues immediately.

## Ultra-fast and easy quality control

EyeC inspection systems simplify and speed up the quality checks of your tobacco packaging. Their **intuitive user interface** helps perform a full and reliable inspection **in just a few easy steps** and is available in all major languages. Furthermore, they deliver objective inspection reports that help you keep track of quality and easily notifies of any noncompliance.

# Inspection of *Tobacco Packaging*

## Key features

- ✔ **Comprehensive tobacco package inspection**  
Checks your entire cigarette and tobacco packs – including artwork and all health warnings – in one inspection cycle.
- ✔ **HWIT (Health Warning Inspection Tool)**  
Generates a compliant reference file by merging your artwork with all required health warnings.
- ✔ **Ultra-fast PDF proofing**  
Shortens pre-press inspection time and allows you to identify mistakes even before producing plates.
- ✔ **Ultra-fast print sample testing**  
Identifies all relevant print defects in record time – such as number mix-up, hickies, broken or filled-in characters.
- ✔ **Pinpoint results**  
Displays the relevant deviations for an efficient check.
- ✔ **File-to-file, print-to-file or print-to-print comparison**  
Verifies the complete content of your packages – in any language against a reference file or printed proof.
- ✔ **Predefined parameter sets to select tolerance**  
Adapts the inspection sensitivity to each job with one click.
- ✔ **Comprehensive inspection report**  
Keeps track of inspection results and certifies quality.
- ✔ **Compliance**  
ISO 9001.

## Options

- ✔ 1D code inspection (Barcodes)
- ✔ 2D code inspection (Data Matrix, QR Codes)
